XMB | Vehicle Arrest Mobile Barrier

THE NEW XTREME IN MOBILE BARRIERS

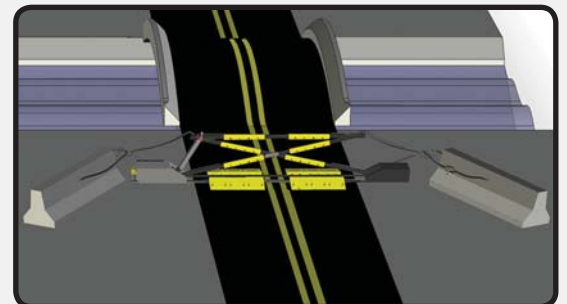

WHAT IS AN XMB?

The XMB Mobile Barrier is the most flexible, easy to use traffic barricade on the market. The XMB system is a completely portable barricade that can be installed and assembled in the field in less than 10 minutes. With its small, lightweight design and ability to be used on virtually any flat surface, the XMB is an efficient security barrier with numerous applications.

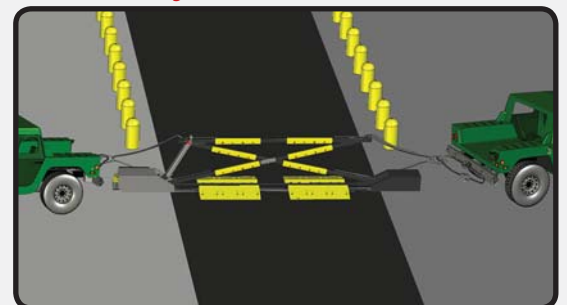

PRODUCT OVERVIEW

The XMB Mobile Barrier offers many features and benefits that no other traffic control barrier system can, such as:

- * No tools required for mobile setup
- * Fast setup and breakdown
- * Wired Remote and/or Wireless
- * Remote and Manual operation
- * 12v battery or 120vac powered
- * Can be a mobile or permanent solution
- * Can be integrated with other security products
- * Customized controls available for the 120vac unit

USR, Inc. offers a warranty on parts for 1 year.

What materials are the beams made of?

The AC & DC units are made of steel. While the military/tactical barrier is made from aluminum segments for easy mobility and transportability.

Ultra Quick Deployment & Mobility

The ease of use and quick deployment that XMB offers makes it the ultimate mobile security barrier. It can be set up or broken down in less than 10 minutes with no tools required making XMB the perfect traffic safety barrier. XMB also has a 2 second deployment speed making it ideal for applications such as military checkpoints, corporate facilities, event security and more.

Flexible Barrier Operation Options (Remote & Manual)

The deployment of XMB can be manual or automated depending on client request. The automated unit includes an XMB remote control that makes for fast, easy

Mobile installation (fully raised beams).

deployment with the touch of a button. Plus, it has the ability to run off of a car battery making it the ultimate mobile barrier solution.

Industry Requested Technology

The XMB Mobile Barrier, like all USR products, was created from an industry requested need. USR, Inc. was approached and asked to create a mobile security barrier that could be set up and broken

Mobile installation (fully lowered beams).

down in minutes, and be used on any flat surface and offer a level of mobility never before seen in a portable security barrier. Rising to the challenge the XMB Mobile Barrier was born and is continuing to change the face of traffic security barriers today.
